IRMA TIMES

An Independent Weekly Newspaper Circulating Throughout Jarrow, Kinsella, Orbindale, Zoldavara, Fabyan, Clark Manor, and Irma District.

VOL. 6; No. 6

IRMA, ALBERTA, CANADA, FRIDAY, May 19, 1922

Single Copies 5c each. \$2.00 Per Year in Advance

Monster Sports Day at Irma, May 24th

Boys of Edgerton, Wainwright, Hardisty, Irma competing for the Provincial Athletic C. S. E. T. Championship. The 24th of May promises to be the biggest boys day ever held in this part of the Province. Last year in competition with all the towns and cities of the Province the boys of Hardisty and Irma won first and second places respectively. The Hardisty Trail Rangers are confident of retaining the Everest Falls Memorial Shield, emblematic of the Provincial Championship for Trail Rangers. The Irma boys are determined they shall not. The dispute will be settled on the 24th of May. The Wainwright and Edgerton boys were not competitors last year so we cannot draw any conclusions at this particular moment. The Wainwright Trail Rangers are a great bunch of athletes in baseball and hockey so there is no reason to doubt they will not be well up in the running on the 24th. The Edgerton boys are the dark horse and may spring the unexpected surprise when the events start.

The program is as follows. 12 P. M. Banquet to visiting Trail Rangers in the basement of the Church. Discussion of plans for the Summer Camp.

1.30 P. M. Weigh in for Athletic meet.
2 P. M. Opening of Field Day.
50. 75. 100 yards Dash.
60 yards Potato Race.
Running High Jump.
Standing Broad Jump.
Hop, Step and Jump.
Throwing Baseball at Target.
Throwing Baseball for Distance.

Prizes will be given to the three boys making the highest total scores in each of the following classes. Class 1. All boys 12 years of age Boys 13 and under 81 lbs. Class 2. Boys 13 over 80 lbs and boys 14 and 15 under 96lbs. Class 3. Boys 14 and 15 over 95lbs and boys 16 and 17 under 111 lbs. First prize — Bathing Suit, Second prize — Sweater. Third prize — T. R. Crest. Records made at the Field Day will qualify the boys for their Jumping, Running and Throwing Badges.

In the evening an illustrated lecture will be given by J. R. Love in the Co-op. Hall at 8 P. M. on Boys' Camps. Some fifty lantern slides are views of our own Irma boys taken at Camp last July and at the Irma Fair. These pictures will be of special interest to the people of Irma. They are unique in many ways and are being shown in many parts of the Province. Don't fail to see your own boys flashed on the screen.

The Entertainment and Reception committees will consist of Stewart Beattie, Alex Smallwood, Charlie Peterson, Chris Burton, Berge Gubbraa, Hoy Ewars.

The program and refreshment Committee will be composed of Wilbet Meyers, Sydney Bibby, Harry Linnen, Lloyd Edmonds, Floyd Hoover, Arnold Tucker.

The Entries for the Athletic Meet include the following.

From Edgerton:—Alf Martinell, Geo. Morrow, Chester Spornitz, Jess Marinell, Ben Wheeler.

From Hardisty:—Alex Morrison, E. Bates, J. Morrison, O. Skogerm, Dick Forman, Jack Forman, Ward Anderson, Arnold Lawson.

From Wainwright:—Jack McLeod, T. Monoham, P. Rice, Bud Mabey, Allan Spence, F. Coffield, F. Murray, Ted Derry, J. Alderman, Jack Carrol, T. Lake Phil Wilkins, J. Beadreau, E. Springer, A. Horne.

From Irma:—Wayne Mitchell, Eric Richardson, Wendel Mitchell, Darrel Peterson, Nelwyn Peterson, Earl Linnen, Geo. Fischer, Dan Mathison.

Mr. Ken. Stewart has volunteered to managed the Canteen for the boys so refreshments of all sorts will be available.

More Gas at Imperial Oil Company's Well

The last reports we had from parties near the Fabyan well was that the drillers had struck another big gas pressure and that the gas was shooting rocks, shells and sand out of the hole. No estimate of the amount of gas escaping from the well can be obtained from any of the employees at the well. In a recent issue of the Texas Oil Ledger, a dispatch from Toronto dated, May 5th states that the Imperial had struck from 20,000,000 to 30,000,000 feet of gas in their well near Irma. Drilling cannot be continued until the gas is under control. In all probability the hydraulic pumps will be used and the gas pressure forced back with the water.

Main Street

Mr. L. C. Hatch shipped two cars of hogs to Edmonton last Wednesday.

Mr. Derman motored to Viking Wednesday.

Mr. D. Ambler has returned from Edmonton where he has been taking medical treatment.

Mr. and Mrs. F. W. Watkinson have been spending a few days at Edmonton.

Miss Mathews returned Tuesday night after spending a few days in Edmonton.

The Provincial Government have a survey party working along the trunk line between Irma and Kinsella.

Mr. G. Sawyer has been building the first house on Madder's addition to Fabyan, the new oil town. Mr. R. Bell intends residing at Fabyan.

Mrs. A. Barker and her two children returned to Irma from England last Saturday night. Mrs. Barker's brother, Mr. A. Evans, accompanied them and intends spending the summer with Mr. and Mrs. Barker.

Mr. D. Boyd, of Dunster, was in Irma last week and shipped some horses and cattle to Dunster. Mr. Boyd homesteaded north of Irma, some years ago, but sold his farm when he moved to B. C.

Eight car loads of Telephone poles have been unloaded at Irma. These will be used for building the lines running to the Orbindale and Zoldavara districts. Some thirty new subscribers will be added to the Irma central.

NEW BLACKSMITH SHOP

Mr. Joe Laughlin has opened a Blacksmith shop in the rear of C. Lattner's Machine Shop and will be glad to have any one wishing blacksmith work done give him a trial. Messrs Askin and Henderson have received all the equipment for their Radio outfit.

LADIES AID NOTES

Ladies Aid met with Mrs. Wyatt on the 10th. The next meeting will be at the Parsonage on May 23rd as the 24 is a holiday. We would ask all ladies in the district to attend, as this is the annual meeting and election of officers for the year.

Mr. G. Elliott has just received returns from a car of oats shipped thru J. W. Wyatt, that graded No. 1 Canadian Western Oats and Mr. Elliott received 54 1/2 cents per bushel for the car. This is the best grade oats that can be grown.

LEWISVILLE

Most of the seeding for wheat is done in this vicinity and conditions seem favorable for a good crop.

The neighborhood is agitated over the incursion of large numbers of cattle and horses being brought in from other parts to graze. Legislation is being put through as fast as possible to put a stop to this, but the machinery of the law is proverbially slow.

It is a pity that this M. D. did not take this measure when all the other districts around saw fit to do it. However, better late than never.

Jim Case is another bachelor around here who suffered loss through fire. His big pile of dry wood, the result of his winter's work not afire, and Bud Cotton coming to his rescue, they had difficulty in saving his house, but the wood was all destroyed.

Miss Daisy Johnson, Lewisville school teacher, received leave from the School Board to go East on Saturday, May 13th, with the rest of her teammates in the Commercial Grade Basketball Six. They now hold the Western Canada championship and are going to contest with the Eastern champs. for the Dominion Championship. The Shamrocks, of London, Ontario hold the Eastern title. Two games will be played against London, one under Western rules, the other under Eastern rules. Total points to decide the Dominion championship. Exhibition games also will be played at Toronto and St. Thomas. Miss Johnson's sister, Miss Dorothy, is also a member of the team. Here's to their success!

Mrs. Bishop and children came last week to spend the summer on their farm. Mr. Bishop will remain in Wainwright at his job in the rumour-house.

We understand that a school is to be established at Fabyan. It is certainly time that there was.

Mr. Bell's new house beside the Adam's store at Fabyan on — is it Imperial Ave.?—looks quite nifty.

Quality Merchandise .:

A Full Line of
**Men's Womens, Boys
and Girls
TENNIS SHOES
And
RUNNING SHOES**
For MAY 24th.

J. C. McFarland Co.

IRMA CO-OP. CO., Ltd

We Do Not Boast--

WE DO NOT BOAST OF THE QUALITY OF THE GOODS WE SELL. WE LET OUR CUSTOMERS DO THAT. WE CAN ASSURE OF THIS HOWEVER, THAT OUR PRICES ARE ALWAYS LOWER THAN OTHERS SELL FOR AND THAT COUNTS IN THESE TIMES.

MEN'S WEAR.

We have some splendid values to offer including men's Work Shirts, Underwear, Sox, Hats, Overalls, and Shoes. Do you require any of these lines?

CHILDREN'S WHITE SHOES

We are selling all lines at greatly reduced prices. You should invest.

LADIES' HOSE.

The most up-to-date and complete line ever shown here. When your supply is short buy from us.

GROCERIES

Fresh Oranges, Bananas, Lettuce, Rhubarb, Pineapples, and Strawberries.

A really nice salmon per tin 10c
Choice Corn, 3 tins for 50c
Splendid Tomatoes, 5 tins \$1.00
Cream of Wheat per sack 40c

It will surely pay you to buy your supplies from us.

Keeps Fresh and Fragrant in the Sealed Package

Cure For Hard Times

Business conditions in Canada are not good at the present time, and while this Dominion is probably in better shape than most countries, that in itself is poor consolation. Instead of endeavoring to find excuses for present conditions, the chief business of every individual citizen should be to find a remedy and effect an improvement. And the hopeful feature of the situation is that an improvement is not contingent on what Governments, Banks and big financial and industrial corporations may, or may not, do. Betterments will be the result of the actions of individuals.

Somebody made the remark a short time ago that hard times had come. This is challenged by one of the most widely traveled and best informed men in Western Canada who says that the person making such a remark was in error, and that he should have said "soft times have gone." We are not so sure that even this is the correct way of putting it. Rather we would say that too many people are acting on the assumption that soft times have come.

There is only one remedy for the existing economic ills from which all are suffering, and that is work. Not work by a few, but work by all. Not a minimum of work, but the full maximum of work of which one is capable. Not work as it is advocated by the six-to-eight hour day, five days a week agitators but work as understood in the biblical injunction "six days shalt thou labor"—that is a hard, honest day's work.

A financial man who recently made an extended trip throughout Western Canada studying conditions, states that wherever he went he heard such questions as, "What are the banks going to do?" "What are the manufacturers, the railways, the Governments, the farmers, going to do?" But in no single instance did he hear a business man or artisan say what HE was going to do. There is as this man said, a mighty serious epidemic of "let George do it" sweeping the country at the present time, and many business men have the disease in a more or less virulent form.

Commenting on the situation as this man found it, a writer in one of the trade journals says: "It has got so that the popular indoor and outdoor sport of today is 'passing the buck,' and yet we are wondering what is the matter with business. We are all waiting for the other fellow to start something, and feel deeply offended when he signals for us to make the first move. The world has grown so used to play that it cannot settle down to work. The boss is talking and thinking golf. In a few weeks he will be playing golf, and his employees pattern themselves upon him. The stenographer spends the best part of her short working day planning what she will wear to the next dance. The office boy is wondering how many grandmothers he will be able to safely bury during the baseball season. It is the aftermath of the boss taking up golf, under the excuse that he is 'keeping himself fit to play more golf.'"

"There's nothing wrong with business that I can see," said this observant traveler, "but there is a whole lot wrong with business men. Too many people are drawing their wages and their breath, and that is about all they do draw—they are trying to look prosperous even if they don't feel prosperous." They are wondering, and waiting, for others to get busy while idling their selves.

It is well to remember, declares the trade journal from which we have already quoted, that success comes in cans and failures in can'ts. There is only one letter between the two, but it makes all the difference in the world as, far as results are concerned, and it is results that count.

The remedy for present hard times, or soft times, is to get away from present-day delusions, and to get back to the good old biblical methods, namely, hard work, bending the back, elbow grease and by the sweat of brows, coupled with the average amount of brains and general thrift, things will soon right themselves.

The great present-day need is confidence coupled with energy and a will to do. Confidence in our country and in our country's institutions, but above all confidence in ourselves. It is time we quit blaming all our misfortunes and troubles on the war, and after-war effects. Millions of men and women during the war learned to look to Governments and semi-government institutions for clothing, food, and the wherewithal to live. This was inevitable when men were taken from their ordinary avocations for military service. But the time has long since arrived when people must stop leaning on such supports, and must exert themselves and provide for themselves. Instead of relying on others to do for them, they must do for themselves. In a word, they must develop their old self-confidence and set to work for themselves.

Until all individuals realize these things, and until they learn that a continuance of so-called soft times in reality means and brings about hard times, the country will wallow in the slough of business depression and unemployment.

New Primer for Western Schools

Has Been Prepared by Edmonton Woman Teacher.

The kiddies in the primary grades of the public schools are to have a new reading book and a committee of provincial primary experts met at the Department of Education in Edmonton with John T. Ross, deputy minister of education, acting as host, the following representatives of the four western provinces were present: Miss A. Gertrude Jackson, Calgary,

for Alberta; Miss E. E. Rankin, Saskatoon, for Saskatchewan; Miss Rebecca Rogers, Winnipeg, for Manitoba; and Miss Kinley, for British Columbia. These form a standing committee appointed some time ago to deal with the matter.

A new primer has already been prepared and was before the committee for examination. It is the work of Miss E. M. Burnett, of the Edmonton Normal School, who bases her compilation for the primary grades according to modern ideas of what little reading-books for little readers should be.

Educational Films

Over 50,000 persons in Saskatchewan viewed the twenty-six educational films distributed by the Provincial Government during 1921. These films, which are issued free of charge, cover a wide variety of subjects, such as tree planting, better bulls, marketing eggs, farm boys' camps, household science, selecting livestock, etc.

Ontario Mineral Production. It is estimated that in the decade's history of mining in Northern Ontario, the various mines have contributed more than \$750,000,000 to the wealth of Ontario.

Maxine Elliott is now the only actress whose name is borne by any New York theatre.

Keep your store of smiles, and your kindly thought, for home; give the world only those you have to spare.

W. N. U. 1417

A Shark Tannery

Will Tan Hides of Sharks at Plant on Vancouver Island

It is planned to start a shark tannery on the west coast of Vancouver Island. The plant will be on a large scale, two boats being engaged in the operations. The hide of the shark is suited to the manufacture of leather of superior quality, for use in gloves, bags, purses and shoes. A very fine oil is extracted and used for medicinal purposes and lubrication. The fins are used in making gelatine. There are many sharks on the west coast, and the industry should become a lucrative one.

DIGESTIVE TROUBLES CAUSE MUCH DISTRESS

Are Nearly Always Due to Thin, Watery Blood

Do not think that because your stomach is easily upset you are the victim of some serious malady. One of the most common causes of digestive troubles is thin, watery blood. In fact it has become generally recognized that healthy activity of the stomach is impossible unless the blood is rich and red.

Dr. Williams' Pink Pills have been found valuable in cases of indigestion, nervous dyspepsia and stomach weakness, just because they are a blood builder and nerve tonic. The rich, red blood following their use not only imparts a healthy digestion, but carries color to the cheeks and lips, and gives vigor to the muscles.

One important point to remember is that Dr. Williams' Pink Pills contain no harmful drugs or quinine and are thus to be preferred to preparations that merely stimulate for a time. Before you begin worrying unnecessarily about your state of health, try the tonic treatment of Dr. Williams' Pink Pills. You will be surprised to see how rapidly your appetite returns and your debilitated system revives.

Miss Sarah Farquhar, North Brookfield, N.S., who has profited the value of these pills in cases of this kind says: "For a long time I was a sufferer from indigestion, which seemed to carry with it a complication of other troubles. Every meal brought misery with it, as the eating was followed by severe pains in the stomach, causing at times nausea and vomiting, and at other times an accumulation of gas that caused severe palpitation of the heart and a smothering sensation. The result was that my general health was seriously affected and the least exertion would tire me out. I had taken much medicine, but did not get more than temporary relief until I began using Dr. Williams' Pink Pills, which I took for a considerable time, with the result that I now enjoy every meal and am no longer distressed after eating. I feel myself in every way enjoying better health, and I cheerfully recommend these pills to similar sufferers."

You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50 by writing The Dr. Williams' Medicine Co., Brockville, Ont.

Rubber Pavements

There may be built as an experiment in Copenhagen a street pavement of rubber for a distance of 220 yards. It is claimed that it would last for fifty years. The noiseless pavement of the court of the Savoy Hotel in London is of rubber, and has been admired by tourists from all parts of the world. But it is a form of pavement that has been considered too expensive for general use.

Asthma Cannot Last when the greatest of all asthma specifics is used. Dr. J. H. Kellogg's Asthma Remedy assuredly deserves this exalted title. It has to its credit thousands of cases which would otherwise have failed to benefit. It brings help to even the most severe cases and brings the patient to a condition of blessed relief. Surely suffering from asthma is needless when a remedy like this is so easily secured.

Britain Pays Again

U.S. Receives Second Installment for Silver Bought During War

Payment of \$19,672,500 by Great Britain as the second installment on the debt of \$122,000,000 created by the Government's purchase of silver during the war has been reported by the treasury of the Federal Reserve Bank of New York.

The payment consisted of \$18,300,000 of principal and \$1,372,500 of interest. A further installment of \$12,200,000 on the debt is due May 15, which will put Great Britain debt in half.

Under the arrangement for payment by Great Britain on the silver purchases, the debt will be liquidated in May, 1924, these payments being entirely apart from the \$5,000,000,000 of war loans due the United States from Great Britain.

Chinese Guarded Silk Secret

For centuries after its first discovery China carefully preserved the secret of silk culture, and amassed great wealth by exporting it to India, Persia and Arabia.

England has a millgirl magistrate in the person of Miss Mary Anne Dewa, a cloth-weaver in the town of Dewsbury, and who has recently been appointed a justice of the peace.

Minard's Liniment for Burns, etc.

Artificial Daylight

Surprising Results are Obtained by Use of Special Colored Glass

One of the most interesting problems in illumination is to provide an artificial source of light which will exactly reproduce ordinary daylight. Such a source of light is invaluable in the textile industry and for the matching of fabrics. One way of obtaining the desired result is to filter the light of an electric or other lamp through special glasses, but a British inventor recently produced another form in which all the light is reflected from an umbrella-shaped reflector on which patches of certain colors are painted.

All the light used comes from this reflector and is modified by the colors to give a very exact imitation of daylight. An improved form of this artificial daylight apparatus has just been patented. The reflector consists of two layers of material perforated with holes so that a certain number of spots of the colors are exposed. Radial strips of another color are placed over the perforated layers, the whole arrangement being mechanically strong and giving the correct areas of the various colors to provide artificial daylight.

Say Canada is Better Market

Conditions Here Much Better Than in U.S. at Present

N. T. Bowman, advertising manager of the Toronto Telegram, who returned from an extended visit to a number of Eastern United States cities, says that many American concerns find sales conditions much better in Canada than in the U.S. at present.

One large firm which uses newspapers almost exclusively in both countries, carrying space of identical size, in papers on both sides of the border, and keeping close check on results, reports that during the past year their sales declined 14 per cent in the United States as compared with only 6 per cent in Canada.

Another firm, manufacturing a widely known toilet specialty, although not divulging actual figures, is not less thoroughly convinced of the superiority of conditions in Canada at the present time. This concern also has very conspicuous attention to results, and it is as a direct outcome of their recent experience that they have recently commenced a very extensive campaign in Canada, using large space in newspapers and magazines.

Mr. Bowman reports that both agencies and advertisers in the United States are devoting a great deal more attention to Canada than has been the case for many years.

Interesting Export Order

One of the most interesting export orders received by a Canadian manufacturer was recently looked by Constant Freres, Limited, of St. Hyacinthe, Que. It was for an organ to be installed in Paris, France, next September, and is important in that it is the first instrument of the kind to be shipped from this continent to Europe. The organ has three manuals, 40 stops and over 3,000 pipes.

'Twas Bad for Business

A grocer is suing the Muskegee, Oklahoma, Daily Phoenix for damages, alleged to have been suffered through the paper carelessly or accidentally leaving out his advertisement. He claims that the loss of business was serious, although only one insertion was omitted.

Girls attending the San Francisco high school of commerce have placed a ban on silk hosiery.

ONTARIO MOTHER HELPS DAUGHTER

Mothers—watch your daughter's health. From the time she reaches the age of twelve until womanhood is established she needs your care and advice. Many women have suffered years of ill-health through lack of such care during this time.

Lydia E. Pinkham's Vegetable Compound is a splendid medicine for girls and women. For nearly fifty years it has been helping mothers and daughters. Let it help you and your daughter.

Hamilton, Ontario.—"When my daughter was thirteen and until she was fifteen she was afflicted with a fever every month so that she could hardly move around the house and when she would have the pains in school she would have to be carried home. Besides the pains and the irregularity she also had headache, dizzy and faint spells, and sore throat."

In her book, I saw your advertisement in the 'Hamilton Spectator' and got Lydia E. Pinkham's Vegetable Compound for her. She does not have the least bit of trouble now, and we both recommend your medicine. She works in a candy-shop now and seems well and strong. I give you permission to publish this testimonial as it is true."

CLAUDE, 76 Walnut St., South Hamilton, Ontario.

Domestics for Saskatchewan. A total of 342 domestics have been brought to Saskatchewan from the United Kingdom under the Government's assisted passage scheme. The total amount advanced to such domestics as loans was \$29,263, and of this amount \$24,190 has been repaid.

Mr. L. R. Littlefield, of McNairy County, Tenn., has 234 direct descendants, including 77 grandchildren; 133 great-grandchildren, and 14 great-great-grandchildren. Mrs. Littlefield is 92 years old.

Minard's Liniment for Dandruff

Rheumatism Is Now Gone And Wellington Walks Well As Ever

"I heard so many people telling me that Tanlac had done for them that I tried it in my own case and I am convinced it is a wonderful medicine," said David Wellington, a well-known drug clerk, Harpersburg, Manitoba.

"For five years I had been a sufferer from rheumatic fever. I simply ached all over from head to foot and my bones felt like they were going to crack. My knees were so stiff actually I used to walk like I had wooden legs, and I just dragged one foot after the other. Everything I ate seemed to sour on my stomach and I was bothered a good deal with backache and headaches."

"I began to improve gradually from the first dose of Tanlac and kept it up until my stomach was in perfect condition and the rheumatism had left me. I am in splendid health now and feel that it is only right that I should tell my experience so that others who suffer as I did may know where they may get relief, too." Tanlac is sold by all good druggists.

Smocking Leaves Waist For Hat Where It Shines In Steel Beads

Charm of line in bluebird model caps fashioned of black satin, with smocking in tiny steel beads is this bit of millinery.

Fasting for Health

English Physician Claims to Have Discovered New Idea

A secret for the preservation of good health is claimed to have been discovered by the English physician, Dr. Leonard Williams, who writes about it in the *Lancet*. He has observed in the case of himself and numerous patients that a fast of a few days strengthened the body against all kinds of diseases and kept all of them youthful, fresh and elastic. Dr. Williams prescribes a three-day fast with no food of any kind and only water to drink. Those who submit to this treatment feel on the first day, craving; the second, resignation; the third, rejoicing and rejuvenation.

The rationale of its beneficence, according to Dr. Williams, is probably as follows: In the ordinary routine of town life we do not completely oxidize all that is taken into the body. There remains a residue, which is only partly oxidized. These "sub-oxidized," as he calls them, are mildly but cumulatively toxic and give rise to many of the minor maladies and discomforts of everyday life.

Kitchen Lore. The lighter the pastry the more the flour is sifted. Rice is delicious boiled in milk and served with sugar and cinnamon. Hot unsweetened cocoa may be used instead of scalding milk in custard for those who prefer the chocolate flavor.

Add a teaspoonful of baking powder to old potatoes when they are to be mashed. It will make them light and creamy.

Add a little salt to the water when preparing hard-boiled eggs. The eggs when taken from the water, are cracked and the shell is easily removed without the white sticking fast.

Perk Up and Smile. Toronto, Ont.—"Less than a year ago I was in a very poor state of health; my back ached dreadfully and I could scarcely drag myself around to do my housework. I started to take Dr. Pierce's Favorite Prescription and I cannot praise it too highly for the great benefit I received. The backache and pains disappeared entirely and I soon was restored to perfect health. I know that Dr. Pierce's Favorite Prescription is the best woman's medicine, for nothing helped me so much as this 'Prescription.' I have no hesitancy in recommending it to other women who suffer as I did." Mrs. Kathleen Williams, 15 Brockfield St.

Reap the Reward of Perfect Health. Orillia, Ont.—"I had a bad case of woman's trouble, suffered from backache, nervousness, and disordered digestion. I had great pain all the time, sometimes I would faint at my work. I had one physician after another but they did me no good. I then took nine bottles of Dr. Pierce's Favorite Prescription and I am fixed up all right. I look much better and feel fine. I will recommend the 'Prescription' to all suffering as I did." Mrs. Marybelle B. Gratrix, Box 340.

Health is most important to every woman. You cannot afford to neglect it when your neighborhood druggist can supply you with Favorite Prescription in tablets or liquid. This Prescription is made in Pierrelaboratory in Bridgeport, Ont. Send 10c there if you wish a trial pkg.

CORNS

Lift Off with Fingers

Doesn't hurt a bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers. Truly!

Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn or corn between the toes, and the calluses, without soreness or irritation.

Swinging Of Pendulum Will Now Be Used For Locating Oil Or Gas

We have all stopped before a clock and watched the pendulum go to and fro, and tick off the seconds of time in its ceaseless work. Why it ticks off seconds, we probably do not know, and furthermore do not care—we simply know that it is its business to do so. However, there is a reason: It is dependent upon the length of the pendulum and upon the force or pull that causes it to oscillate. We change its length the period will be different, or if we change the force or pull, retaining the same length, the period will again be different.

The pull or force is essentially the attraction of the earth upon the displaced bob of the pendulum, so that if we allow a pendulum of invariable length to swing in different parts of the earth and note the number of swings it makes, say in an hour or in a day, it will give us a measure for determining the difference of pull or attraction of the earth, which would mean that it would tell us the relative distance that we are from the centre of the earth at the various stations of observation. From this it is obvious that the figure or ellipticity of the earth may be found by means of the pendulum.

The figure and rotation of the earth affect the pendulum in two distinct ways. In the northern hemisphere going southward, say from Ottawa to Washington, we get a little farther away from the centre of the earth on account of the equatorial bulge. Then, furthermore, at Washington the centrifugal force is greater, there is a greater tendency to fly off; so that altogether the pull at Ottawa is greater than it is at Washington.

It may be observed that a miner, weighing his gold in the Yukon by means of a spring balance and believing it to represent so many pounds and ounces, would naturally be surprised if he weighed that same gold with the same spring balance in Ottawa, before turning his gold over to the Mint, to find that it weighed less here by something like the 50th part of what it weighed in the Yukon. This is due to no fault of the scale whatever, but shows that gravity is less at Ottawa than at places further north. This is one reason why spring balances are illegal as appliances for weighing. The greatest difference in gravity upon the earth is between the poles and the equator, where the difference amounts to fully one two-hundredths.

With the great many pendulum observations, or gravity observations, as otherwise called—because by means of the pendulum we determine the gravity of the earth—distributed over many parts of the earth, besides actual linear measurements which have been made, the figure of the earth is determined with a high degree of accuracy, so that at any given latitude we know in advance what the theoretical value of gravity should be or, which is the same thing, we know accurately the length that the pendulum must have in order to swing seconds there.

The mean density of the earth, which is a little over five and a half times that of water, has been well determined and more so the densities of the many different kinds of rock formations and other minerals that constitute the crust of the earth, upon which the oscillations are dependent. Any change in the distribution of them will, therefore, affect the time of the oscillations of the pendulum. It is obvious that the nearer matter is more effective than matter more remote in its attraction on the pendulum.

All the preceding is to explain and emphasize that the oscillation of a pendulum is dependent upon the distribution of matter around it and below it.

We are just now at the point of revealing what the pendulum shows and by work carried on by the Dominion Observatory. Let us here say a few words of the pendulums used for gravity observations. These pendulums have no clockwork. They swing on an agate plate supported by an agate knife-edge. The time of oscillation of a single swing is determined to an extraordinary degree of accuracy—to the one ten-millionth of a second of time—the time being derived from the stars.

Hence, if we set up our apparatus at a place whose latitude is accurately known, and determine the time of oscillation of the pendulum, whose period is known at a given place, like Ottawa and Washington, we will find whether there is an excess or defect of mass about the station or place. In another word, and the revelation is made. We find, for instance, that the pendulum swings too quickly for that particular latitude, which would

mean that there is an excess of mass acting on the pendulum. Such a result would absolutely preclude the presence of oil or gas in the rock formation. This is surely something worth knowing to the prospector or company about to drill for oil or gas. It seems a far story that the pendulum, quietly and almost invisibly swinging with small amplitude, in a small exhausted iron case, should tell so surely and so well whether oil or gas are below it; for where oil or gas are, the same space cannot be occupied by dense rocks, and if dense rocks are present to excess there cannot be oil or gas in any quantities present, so that the pendulum tells us positively of the absence of oil or gas.

If, on the other hand, we find that the pendulum is swinging too slowly, when its period is too long, this would mean that there is present a defect of mass, the reason for which may be oil, gas or rock of small density, so that while the pendulum is able to register definitely the absence of oil and gas, which may mean the savings of thousands of dollars unnecessarily expended in the search for these desirable commodities, it only forecasts the possibility of the presence of oil or gas.

Sea-Otter Becoming Rare

Animals Only Found In Parts of North America

An animal that is becoming rarer every year and will soon be almost unknown is the sea-otter.

These beasts are very like seals and are found in parts of North America. A curious feature about them is that they never collect in big parties but live in pairs. The female sea-otter is also a good mother and will fight for her young when attacked by the hunters.

The Eskimos have adopted a very ingenious device for finding out the whereabouts of the animals. They suspend a number of bells from posts and connect them by means of string with the shallow parts of the sea which form the animals' haunts. Consequently, when an otter is approaching she moves the string and the bells ring to warn the hunters.

Sea-otters are generally killed while asleep either on the ice or the top of the water. The animals sleep on their backs with the young otters in their paws in the same way that a mother holds her baby.

Other fur, which is highly prized, especially in China, is becoming very difficult to obtain.

One Beauty of Winter

Snow Acts as Silencer and Gives Relief from Noise

One beauty of a Canadian winter is that it deadens noise. The snow comes and puts a silencer on the traffic on the streets, and the double windows aid it in keeping out noise. It might be said that these windows also keep out the dust, but perhaps that is offset by the dust the furnaces and stoves make—but suppose there were both!

Just think of this now the spring has come and the time almost for no more snow and no more double windows, and later on ponder over Carlyle's words: "That which the world torments one in most is noise. It is the devil's own infernal din, the blessed day and his confounding God's work and His creatures. A truly awful combination; and the worst of all is a railway whistle, like the screech of 10,000 cats, and every cat as big as a cathedral."

And then try to prevent as many unnecessary noises as you can—Kingston Standard.

Old Prophecy Fulfilled

The marriage of Princess Mary and Viscount Lascelles will fulfil a curious old prophecy, of which few people are aware. More than 150 years ago, in 1770, it was said that one day the daughter of a King would be found in the Claircaire family and would wear the famous jewels of that house. That is now coming true, for Lord Lascelles's mother was of that family, and it was from his uncle, the late Lord Claircaire, that the bridegroom inherited not only a considerable fortune but the famous gems which Princess Mary is entitled to wear.

Produce Effervescent Milk

The fact that pure sweet milk is one of the most wholesome and nourishing beverages has led to many attempts to find a method of preserving it. A patent has recently been granted for a process of preservation by which milk is converted into an effervescent beverage which may be kept for long periods, much as is now kept grape juice or ginger ale.—From the May Popular Mechanics Magazine.

International Science Conference

Canada Will Be Well Represented at Meeting in Rome

When it was decided to hold an international science conference at Rome in May of this year, the National Committee of Canada appointed five delegates, three of whom are being sent to the conference by their respective departments in the Dominion Government service. These are Dr. Otto Klotz, Director of the Dominion Observatory, representing astronomy; Dr. E. Deville, Surveyor General; and Dr. W. H. Dawson, Superintendent of the Tidal and Current Survey, Department of the Naval Service, Ottawa.

In explaining the scope and work of the International Science Conference, Dr. Dawson states that "at the time that the League of Nations was founded in 1918, there was held in London an International Allied Conference to consider the necessity for the formation of a new international scientific organization." In November, 1919, a further conference was held in Paris, and it was at this conference that the International Research Council came into existence. Under this council there are two unions, namely, the International Astronomical Union and the International Union of Geodesy and Geophysics. All the Allied countries were invited to participate in the necessary arrangements, and to co-operate with the International Research Council. In conformity with a general resolution which was passed by that council, each International Committee shall be formed of representatives of appropriate scientific societies and public services, and by representatives of the Government. It shall be nominated by the principal Academy of Science of the country concerned, or by its own National Research Council, or by some other competent National Institution.

"Astronomy in Canada is carried on extensively by the Dominion Government which has a Dominion observatory in Ottawa, and an Astrophysical observatory at Victoria. The subject is also ably supported by the Royal Astronomical Society which has its headquarters at Toronto. It is thus quite fitting that an international committee representing astronomy should be formed in Canada.

"Under the International Organization of Geodesy and Geophysics is still more comprehensive. The work carried on under this heading by the Dominion Government is under the direction of four different departments. In the Department of the Interior, there is a Topographical Survey under the Surveyor General; the Geodetic Survey of Canada, including triangulation and levelling, and the investigation of earthquakes and terrestrial magnetism under the direction of the Dominion Observatory. In two other departments, there are the Geological Survey, and the Meteorological Service for the study of climate. In the Naval Service Department there is the Hydrographic Survey engaged in making charts of the coastal regions and the Great Lakes; and the Tidal and Current Survey, which includes the investigation of the tides on the eastern coasts of Canada and on the Pacific, as well as in Hudson Bay.

The National Committee of Geodesy and Geophysics for Canada includes the men at the heads of these various branches in the government service, as well as a professor in one of our western universities, making ten in all.

The X-ray is used in aeroplane construction to detect defective materials, weak metal castings and workmanship, which would otherwise escape the eye of an inspector.

Bulgarian Women Working

Volunteer Labor Army Doing Much to Restore Country

Even King Boris' two sisters, the Princesses Rudolphe and Nadejda, will be obliged to contribute their share of work to the Bulgarian state under the new compulsory labor-law, which requires all women up to 30 years of age to serve at least 10 days of their time every year in useful work to the community.

This ruling has been made by the stern peasant premier, Alexander Stambouliski, the most powerful man in Bulgaria and maker and breaker of kings.

Bulgarian women, said the premier, will be compelled to make garments and bed linen for hospitals, contribute useful labor to orphanages and asylums, help to care for the poor and so on. Girls under 20 years old will be obliged, for a period of three months in each year, to study domestic science and the useful arts, so that they may become more productive factors to society and contribute to the common good.

Premier Stambouliski says that one of the causes of Bulgaria's rapid recovery from the work is the labor done for the state by what is called there the volunteer labor army.

Skill Required

Two Irishmen were standing in the stern of a Channel steamer. Said Mike: "O' can't see how the captain finds his way across the Channel at all. Now, if we was going' the other way he's only have to follow the white streak of foam there. But if ye go up the other end o' the boat, ye'll find there's never a mark to go by.—Wayside Tales.

Will Provide Help for Farmers

In anticipation that between 3,000 and 3,500 men will be required for seeding operations on the farms in Saskatchewan, the Bureau of Labor is planning to provide that amount of help for the farmers this coming season, it is announced at Regina. The estimated number of men required is about the average of the past few years.

Domestic Troubles

When it is understood that a housewife in Vienna has to consider whether she shall pay her household bills in the forenoon or in the afternoon, because exchange may fluctuate anywhere between fifty and two hundred per cent, in an hour or so, some idea will be gleaned of the economic mess in Europe.—Victoria Times.

Fort Prince Of Wales The Most Northerly Fortress On This Continent

Iceberg Travels Across World

Monster Berg from Frozen North Seen Near Honolulu

A strange sight has been witnessed in mid-Pacific.

For the first time, as far as records go, an iceberg has floated from the frozen north right down the Pacific into the region of the tropics, and has been seen off Hawaii by a Japanese liner that was on its way to San Francisco.

The Shinyo Maru was exactly one day's journey out of Honolulu when the master, Captain Maki, saw the iceberg. At first he could not believe his eyes, and supposed that it was a particularly large whale, but when he turned his glasses upon the object it was evident what it was.

A New York writer who was on board, and others on the vessel, confirmed the fact, and now scientists are trying to explain the iceberg's presence in this unusual quarter of the globe.

It is supposed that an exceptionally gigantic berg broke off from the Arctic ice-cap, passed out of the Behring Sea, and was caught in the North Pacific current after successfully rounding the Aleutian Islands.

Of course, as it travelled through the warmer waters it must have gradually melted, but its immense initial size enabled it to reach the tropics as a great berg. Captain Maki estimated its length when he saw it at about two hundred feet.

It would be interesting to know its further history, but, in any case, it cannot have long survived after reaching tropical seas.

Track Meet At

Saskatchewan University

High School Boys from All Over the Province Will Attend

High school boys from all parts of the province will compete in track and field sports at the University of Saskatchewan on May 19th, when the first provincial high school day will be held under the auspices of the Athletic Director of the University. A similar meet is conducted in Eastern Canada by McGill University with great success, and contests of the same kind are held at most of the State Universities.

Interest in the meet seems to be widespread, and from a town as far removed from Saskatoon as Herbert has come word that a team of six or seven boys will be sent. The net receipts at the meet will be applied toward paying the travelling expenses of the competitors, and the boys while in Saskatoon will occupy rooms in the University residence. Full information as to the events and the rules and regulations may be obtained by writing to the Field Day Manager, University of Saskatchewan, Saskatoon.

Dominion Agricultural Publications

Bulletins on Important Subjects Can Be Obtained on Application

Besides the reports of the divisions and experimental farms, stations and sub-stations of the Dominion Experimental Farms System, the Publications Branch of the Department of Agriculture at Ottawa announces that bulletins on the following subjects may be had on direct application: Bee Diseases; Beef Scrap virus; Skin Mills for Egg Production; Commercial Feeding Stuffs; Fertilizers for Flowering Plants, Vegetables, Small Fruits and Lawns; List of Publications, Outlook for Dairying and the Marketing of Dairy Produce; Swine Husbandry in Canada (2nd edition); Why and How to Use Milk; Crop Rotation; the Potato, its Cultivation and Varieties; Seed Treatment for Smut; the Control of the Corn Borer; the Control of Grasshoppers; Beautiful Homes and How the Farmer May Make Them.

That's Politeness

A woman in a New Orleans hotel said to her 5-year-old neighbor one morning: "As your mother isn't with you this morning my little man, I'll cut your steak for you if you think I can cut it the way you like it." "Thank you, ma'am," the small knight replied. "If you don't cut my steak the way I like it, I'll be sure to like it the way you cut it."—Exchange.

Most Natural Thing in the World

A Scotchman crossing the road one day saw a threepenny bit lying in the mud. He stooped to pick it up and was struck by an automobile with fatal result. At the inquest the facts were put before the coroner, who gave the verdict as "Death due to natural causes."

On February 4, 1922, the old Fort Prince of Wales, which occupies the west peninsula at the mouth of the Churchill River, Hudson Bay, was placed by order in council, under the control of the National Parks Branch of the Department of the Interior, and will henceforth be preserved as one of the chief historic memorials of West in Canada. The old fort has the distinction of being the most northerly fortress on the American continent, and at the time of its completion, in 1747, was the strongest fort in North America, not even excepting Quebec.

According to the original plans its walls were to have been 42 feet thick, but, owing to some objection on the part of the Governor they were first built 25 feet thick. This, however, was judged inadequate after a certain amount of heavy-artillery practice, and one section of the wall was pulled down and rebuilt according to the original specifications. The fort mounted 40 guns, carrying from 6 to 24 pounds.

In August, 1782, Samuel Hearne, the Hudson's Bay explorer and Governor of Fort Churchill, received the astonishing information that England and France were at war, and that Admiral de la Prouse, with a force of 400 soldiers, was waiting outside of the fort for his surrender. As a prisoner, he witnessed the efforts of the French Admiral to demolish the massive fortifications, which had taken four years to build. Since that time the fortress has remained a picturesque and romantic ruin, uncertain of its fate, and always in danger of being blotted from the national memory. There is now every probability that, in the course of time and as opportunity offers, the old fort will receive the attention and care from the National Parks Branch that are being devoted to other historic sites, and that the old ruin, with the fifty acres of land attached, will become an interesting feature of the ever-extending scheme of Dominion parks.

The Necessity for Clean Seed

Properly Equipped Fanning Mill is Essential on Every Farm

To maintain the farm in a clean condition and free from weeds it is necessary that the seed sown should be clean, whether it be grain or grass. As few people buy all of their seed, a properly equipped fanning mill on every farm is a practical necessity. What a new mill is to be preferred, this is not always necessary.

At times like the present when economy has to be practised, an old fanning mill can often be put into condition to do work with comparatively little expense. In most districts in the older settled parts of Canada there are many fanning mills that were bought fifteen or twenty years ago. They may have been originally equipped with thoroughly good sieves, in fact, the best in those days, but when wires become bent and sieves broken, the mill, however good it may be in other ways, cannot be depended on to separate seeds as it should. It may be that the farmer has no other particular mills cannot in all cases be procured, but there still remains a means for their renewal. The seed laboratories at Ottawa, Winnipeg and Calgary, are prepared to examine samples of seed at any time with a view to advising what sieves to use and where they may be obtained. For such examination, samples of from eight to ten ounces should be submitted. The sender should state the kind of mill he has. In Pamphlet No. 4 of the Department of Agriculture at Ottawa, the Seed Commissioner recommends the sieves that should be ordered for the cleaning of clover seed, grass seed, and the various kinds of grain, and gives diagrams of same.

Mineral Dyes Made in B.C.

The first consignment of finished product was turned out recently from the Pacific Colour Company's plant at Chilliwack, B.C. The plant, which has a capacity of three tons of dry dye colour a day, is the second to be opened in America to take advantage of a German method of preparing mineral dyes and colours. The raw material used is lead ore from Field, and subsidiary ingredients from Bunson Lake district, British Columbia.

Tree Planting in the West

The civic authorities of Calgary are aiming to have 10,000 trees planted in the parks and on the streets of that city in 1922. Other cities and towns on the prairies have also planned tree-planting campaigns. This planting of trees in urban communities, along with the millions of trees now being planted annually on prairie farms, will in a few years make a great change in the aspect of the prairie provinces.

NO PUMP TEST POSSIBLE
WITH SALEMAN'S PUMP

Because of a missing part on the pump, no test was made at the Kevin well this week, upon the visit of President F. H. Hillman of the Standard of California.

"Parkersburg Bill" Bolden sent in the order properly enough but when the pump was assembled it was found that a demonstration packing case, one side being cut away to reveal the working parts, was included. Thanking the Rig and Reel for the demonstration, Gordon Campbell wired for a new packing case.

With Mr. Hillman on his visit to the well were: A. S. Palmer, Montana manager of the Standard, E. L. Ickes, George M. Cunningham and Thomas R. Romine of the geological staff and Dana Hogan of the land department. J. M. Atwell and H. H. Achley, vice-presidents of the company, visited the well three weeks ago. Mountain Oil Journal.

OIL COMPANIES IN COMBINE
TO BOOST GASOLINE PRICE

While the oil companies of the United States have been boosting the price of gasoline to an unprecedented peace-time level, they have been accumulating the greatest stock of fuel on record, states a special dispatch to The Globe from Washington. The dispatch continues:

"The nations gasoline stock on April 1st, passed by some 47,000,000 gallons the high record of 807,000,000 gallons reported in storage March 1st, according to a statistical summary just issued by the Bureau of Mines. Stocks of 854,232,000 gallons were on hand April 1st, a supply of 20 per cent greater than for April, 1920.

Domestic consumption of gasoline for the first quarter of 1922 shows an increase of seven per cent. over the first quarter of 1921, and 25 per cent. over the corresponding period in 1920.

GEOLOGICAL TERMS

Our lady subscriber from Poison Spider who is the owner of a first class boarding house here to inquire what is the difference between an "anticline" and a "syncline." The inquiry was referred to our inquiring geologist, Rim Rock Jones, who gave us the following answer:

An anticline is a hump in the earth where oil is generally supposed to be but seldom is, while a syncline is a hollow in the earth where oil is never thought to be but often is.

The ancient and honorable game of "horse shoe" seems to be the only line of sport that is flourishing in town. Prospects at this time of the year for a crop were never better. There had been a good rainfall and now the weather has turned mild and warm. Watch Sunny Alberta produce the best crop in many years.

A band of gypsies visited town on Monday and wished a number of our citizens "good luck" at so much per.

NEW FREE LAND MAP.

The total number of quarter sections of Crown land still available in each township is shown on the 1921 edition of a 1:63,000 map of Manitoba, Saskatchewan and Alberta recently issued by the Department of the Interior. Likewise the number of quarter sections of unoccupied and unencumbered lands held in private ownership that are purchasable from the landowner. This latter feature, showing at a glance what lands are for sale, should prove of great service to the land seeker. Supplementing to the map, the Department has compiled for each district, lists containing information as to the price of the land, terms of land, terms of sale, nature of soil, average fit for cultivation, value of buildings and other matters helpful to the prospective purchaser. With such information in his possession the intending settler may then negotiate with the owner of the land.

Another important feature of the map is the Railway Belt information which has been shown in three different shades of color on each side of all railway lines, to signify land within 4, 10 or 15 miles of a railway. Among other details shown are the Dominion Parks, the forest reserves, land districts and agencies, surveyed townships, and railway information to date. A copy of the map, also a list of the unoccupied lands for sale in any particular district may be obtained free of charge, upon application to the Natural Resources Intelligence Branch, Department of the Interior, Ottawa.

60 PER CENT OF ALL OIL STAYS
IN GROUND. HOW GET IT OUT

While diplomats bicker and bluster over the control of remote corners of the world supposed to contain deposits of that precious fluid, petroleum, large quantities of oil, perhaps as much as 80 or 90 per cent of the original reservoirs, are left underground in the United States when wells are abandoned because no means have been determined whereby it is possible to recover more than a small percentage of the oil, according to A. W. Ambrose, chief petroleum technologist of the Bureau of Mines. This failure to effect a greater recovery of the underground oil is due to the exhaustion of the subterranean gas flow, says Mr. Ambrose.

It is unquestionable that large quantities of oil are left underground and, whether the figure is sixty per cent or eighty per cent, it is too large. In certain parts of the Appalachian fields, the practice of forcing compressed air or gas into a central well, from where it goes to adjoining wells and carries the oil with it, has caused wells to produce as much oil as they had up to the point when considered ready for abandonment.

"There are undoubtedly other means of effecting a greater recovery, and these questions should be studied and applied before the wells are abandoned."

PURE OIL TELLS REAL
VALUE OF PUMPER WELLS

What is an oil well really worth? Here are figures furnished by the Pure Oil company not for promotion purposes, and therefore reliable, on its Cabin Creek properties in West Virginia have been producing since 1914:

Well No. 88 was completed in June, 1917, with an initial production of 47 barrels daily, at a cost of \$11,189. Its production to April 1st, 1922, aggregated 137,000 barrels which yielded a gross income of \$670,255 and after deducting drilling cost and operating expenses from the beginning to that date, showed a net income balance of \$658,891. This well is flowing 30 barrels a day of premium crude and the Pure Oil Co. expects this well to yield approximately 1,000,000.

The Pure Oil asserts that the pumper wells of the Cabin Creek district are worth more over a period of five years than are the big gusher wells of the newer fields.—Montana Oil Journal.

A LECTURE ON
COMMUNICABLE DISEASES
A DEMONSTRATION
ON HOME NURSING

The U. F. W. A. have completed arrangements for two lectures to be given in the Co-op. Hall on May 26th and 27th at 2.30.

The Provincial Department of Public Health, co-operating with the U. F. W. A. have arranged to have one of their nurses give these two lectures. On May 26th, the nurse will give a lecture on communicable diseases. On May 27th she will conduct a demonstration in home-nursing.

These lectures are free and open to everyone.

Every woman in the district should make it a point to be present at both lectures.

NOTICE

Municipal District of Buffalo Coulee No. 453.

Notice is hereby given that if all arrears of taxes imposed in 1921 and previously in respect of any parcel of land situated within this Municipality are not paid on or before the first day of July next, such land will be dealt with under the provisions of The Tax Recovery Act, 1922, with a view to obtaining certificate of title in the name of the Municipality in respect of such parcel.

Arthur Curtis,
Sec'y-Treas. M. D. No. 453.

G. W. V. A. PASS RESOLUTION AT
LAST MEETING.

Irma, Alta., May 7th, 1922
 Resolved that in the opinion of the G. W. V. A. of Irma, that the Soldier Settlers of Canada are unduly obligated and oppressed by having to pay all their indebtedness to the Soldier Settlement Board before they are allowed to make a sale; that in our opinion they ought to be allowed to transfer their property by paying for their equipment and twenty-five per cent of their landed indebtedness. Also that Soldier Settlers are discriminated against generally by reason of the Soldiers Settlement regulations, and that a copy of this resolution be forwarded to Comrade Maxwell, Ottawa, to be acted upon.

MUNICIPAL DISTRICT OF
KINSALLA No. 424.

Public Notice is hereby given that there has been introduced in the Council of the Municipal District of Kinsella No. 424, the following by-law:—

By-law No. 11.
 By-law of the M. D. of Kinsella No. 424 respecting the prohibition of animals not the property of residents of the Municipality from grazing within the bounds of the Municipality. Under the authority and subject to the provisions of the Domestic Animals Act, the Council of the Municipal District of Kinsella No. 424 enact as follows:—

"Domestic animals not the property of residents of the Municipal District of Kinsella No. 424 shall be prohibited from grazing within the said Municipality in accordance with the following schedule:—

Horses prohibited from grazing Jan. 1st to Dec. 31st on all 45-10-4. Mules prohibited from grazing from Jan. 1st to Dec. 31st on all 45-11-4. Cattle prohibited from grazing from Jan. 1st to Dec. 31st on all 45-12-4. Goats prohibited from grazing from Jan. 1st to Dec. 31st on all 46-11-4. Sheep prohibited from grazing from Jan. 1st to Dec. 31st on all 46-12-4.

For the purpose of this By-law a resident shall mean any person who resides within the Municipality and is either a tax payer thereof or a tenant at a rack rent of lands therein, or any person or corporation who carries on a business therein, who or which is either a taxpayer of the said Municipality or a tenant at a rack rent of lands therein, and in either case carries in his or its business by means of bona-fide officers or employees with a settled abode in such Municipality.

Any violation of this By-law shall be an offence punishable on summary conviction by a fine, which shall not exceed the sum of \$100 for each day during which the violation is proved to have continued, and further that unless within thirty days from the publication of this notice at least 40 resident electors of the Municipality petition the Council to submit such By-law to the vote of the resident electors of the Municipality the Council will proceed to pass the same.

Signed—Blake H. Green, Sec.-Treas.
 Municipal District of Kinsella No. 424.

KINSELLA

The Kinsella district is again in
need of a doctor. Dr. Archibald has
taken up practice at Holden.

Four carloads of hay have just been
shipped out of Kinsella to southern
Alberta by E. C. Williams.

Vic. Reid has rented the former H.
S. Williams' farm and is busy at
spring work.

Ebe Sutherland has secured George
Lee's farm and is at work putting in
the crop.

N. P. Johnson and family have ar-
rived from Olds, Alberta, to settle on
their farm north of town. They formerly
resided here.

The baseball club is circulating a
petition to the citizens for their fi-
nancial support to purchase equipment
for the present season. So far the
response has been good.

On May 22nd and 23rd a Provincial
Public Health Nurse will be in Kin-
sella in the interests of the people of
the district. On Monday, May 22nd,
she will lecture on "Communicable
Diseases," and on Tuesday, May 23rd,
she will give a demonstration in
"Home Nursing."

Fire completely destroyed the house
on J. Loftus' farm west of town, early
on Saturday morning, April 22nd.
Jos. Beschell and wife were occupy-
ing the house and it appears that the
fire was lit in the cook stove and while
the people were in the barn, smoke
was noticed, but too late to save any-
thing. All household effects and
clothing were burned.

The Kinsella sand pit is opened up
for business, with Mr. McDonald,
of Edmonton, in charge. Mr. McDonald
reports that the demand for sand and
gravel this summer is good and a
busy season is expected. It is also re-
ported that the Canadian National
railway will put in a steam shovel in
its gravel pit here in the near future.

SPORTS DAY AT

JARROW, JUNE 3rd

The Jarrow Board of Trade have
arranged to hold a Sports Day at
Jarrow on Saturday, June 3rd, in aid
of the Memorial Hall Fund and Lots.
A full program of sports is being ar-
ranged. An enthusiastic meeting was
held Monday evening when the ne-
cessary committees were appointed.
Keep June 3rd open for Jarrow.

BATT

Spring's work is progressing nicely
and the farmers are all very enthu-
siastic over the recent rains and look
for a bumper crop in the fall.

Hugh McQuire spent Sunday at
John Therou's.

Mrs. William Lockhart who has
been quite ill is improving slowly.

Mr. and Mrs. George Therou en-
tertained a large company of friends
on Sunday. All report a very pleasant
time.

The play "Thompson's Hired Man"
was successfully put on again at the
Batts School on April 28th.

On May 5th it was given at Kinsella
under the auspices of the Ladies' Aid.
A full house turned out which was
certainly appreciated by those taking
part in the program. E. Schroeder
rendered some excellent music on the
piano. Mrs. Wangness, Miss Lunn and
Mr. Kearns gave excellent vocal se-
lections. Johnnie Therou's recitation
"Towser Shan't be Tied Tonight,"
was enjoyed by all and his other rec-
itation "These Hoodlums' Pants,"
brought down the house. We surely
hope that Stanley will be more partic-
ular in the future when buying Sun-
day pants. The dialogues given by the
children were well done and enjoyed
by all. After the program a big lunch
was served to all present.

GOV'T CREAM GRADING STARTS

Elimination of the cream buying
and cream grading stations, and the
inauguration of the system of govern-
ment grading, which came into being
last Tuesday, has had its immediate
result in the announcement of an in-
crease in five cents per pound paid
to the farmers for cream. This an-
nouncement was made by E. T. Love,
secretary of the Alberta Dairymen's
Association, who said that the new
high price was being paid by all the
creameries in Alberta.

Inauguration of government grad-
ing of cream has placed cream grad-
ing on such a basis of certainty that
the dairies and creameries, now free
justified in fixing immediately a
premium for high grade cream, high
enough to make a substantial induc-
ement to farmers to produce the high-
est grade. Hitherto, with the grading
of cream, a great uncertainty, this
differential price between grades was
kept so close as to offer little induc-
ement. Now, after five cents have been
added to this differential and the pro-
ducer of cream finds himself faced
immediately, as a result of the opera-
tion of the new system, with a fac-
tor that gives him the greatest en-
couragement to produce the very
highest grade of cream his herd and
his equipment are capable of produc-
ing.

Over thirty government graders
were at their posts in different parts
of the Province last week, entering
enthusiastically into the spirit of the
new movement calculated to set the
dairying industry back upon its feet.

Before getting to their posts, the
government graders underwent a
short course of instruction under the
direction of C. P. Marker, dairy
commissioner, at the University at
Edmonton. At the last session of this
short course the graders, as well as
representatives of creameries, were
addressed by officials of the depart-
ment of Agriculture on the import-
ance of their duties. Hon. Geo. Hoad-
ley, H. A. Craig, and Mr. Marker all
emphasized the fact that the Depart-
ment was looking to the new system of
grading and marketing of cream
to bring about a revival of the dairy
industry in the Province and to put
it upon a basis that would eventually
bring it to the stage of the most im-
portant branch of agriculture, and
in addition recover markets which Al-
berta butter formerly had held.

The particular function of these
graders will be to grade the cream
delivered at the creameries. They will
have nothing to do with setting the
price for cream, nor will they act in
any way as an arbitrator between the
creameries and the farmers.

The Dairy Commissioner, Mr. Mar-
ker, has expressed the opinion that
the new system will bring the produc-
tion of high quality cream back to
where it was in 1919, in one year, and
in two or three more put the industry
upon a more satisfactory basis than it
has ever known in the Province.

The new system of Government
grading of cream is the first to be
inaugurated in the history of Canada,
and, so far as is known, in any other
country.

Silver Lane.

Good morning, readers of the Times.
We are glad to join your circle. May
we now introduce ourselves?

We are Silver Lane School district
No. 2364. We were formerly known
as Bronson School. Our school house
is about ten miles south of Irma on
the Hardisty road, but our territory
extends north to include Pete Har-
vey's home; and a number of our
ratepayers get their mail at Irma and
deal with merchants there.

C. A. Riley is chairman of the
school board. Our teacher is Mr. J. B.
Horn, with Mrs. E. Quittenton as
special instructor in music and voice
production, one hour a week.

We trust that this brief sketch will
explain to you who we are and hope
you will enjoy our association with
you as much as we ourselves expect
to.

Inspector Geo. K. Haverstock vis-
ited the school Thursday of last week.
Mrs. C. A. Riley who was injured
by a fall two weeks ago is still con-
fined to her bed.

Nate Moore and daughter Enid vis-
ited at Jarrow Sunday. Frank and
Roy Reber drove them across in the
Ford.

Mrs. Quittenton last week organized
a class in voice production and music
at Hardisty. The class consists of
ten children between the ages of eight
and twelve. Mrs. Quittenton meets
the class on Friday afternoons.

Mrs. James Walters and son Verle
arrived last week from Weyburn
where they have been visiting while
Mr. Walters and another son Lynn
were preparing their new home to re-
ceive them. The Walters formerly lived
at Edmonton and have purchased the
Palmer farm.

Twenty-one people of the commu-
nity met at the school house Sunday
afternoon and organized a Sunday
School. Officers chosen were: Sec'y,
James Walters; Assist. Sec'y, C. A.
Riley; Sec. Treas., Mrs. J. B. Horn;
Organist Violet Bronson; Chorister,
Ray Bronson. The Sunday School will
meet at the school house at eleven
o'clock each Sunday morning.

Mr. Charlie Miller and family of
Jarrow vicinity were guests of J. W.
Bronson and family, Sunday.

Rev. Lewis and Dr. Anderson of
Hardisty, were visitors at Sunday
School, Sunday. Rev. Lewis gave an
interesting exposition of the Scripture
lesson.

Mr. and Mrs. James Walters were
in Irma Monday for their household
goods which had just arrived from
Weyburn, Sask.

Mrs. Charley Reid, of Irma, returned
to her home Sunday after a few
weeks stay with Mrs. N. Moore. She
took with her an infant son to whom
the name George has been given.

Jim Bell made a trip to Hardisty
last Wednesday to purchase wire
for fencing the Tomlinson farm. Jim-
mie has seeded this farm to wheat,
which is up and looking fine.

The school children are busy mak-
ing garden this week on a portion of
the school ground, under the super-
vision of the teacher. It is planned to
put in a small plot of each farm and
garden crop grown in Alberta. The
radishes and lettuce will be used with
lunches this summer, while a portion
of the potatoes and roots will be pre-
served for serving hot dishes during
the winter.

Mrs. C. A. Riley is recovering from
injuries received in a fall four weeks
ago and is now able to be up a por-
tion of the day.

Mrs. Archie Campbell and Miss
Watt, teacher of Glenholm school called
on Mrs. Riley, Wednesday evening.

Liniments Won't Relieve Pain Between the Eyes

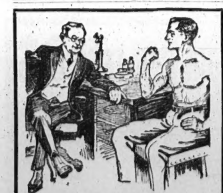

That pain is not rheumatism or neuralgia. Many people who suffer from this so-called "eye pain," which is due to Catarrh, plain ordinary Catarrh, and needs attention right now. Catarrh is the name of a wonderful invention that is daily rising up chronic cases of weak throat, bronchitis and catarrh. Every breath through the Inhaler is laden with soothing, healing substances that destroy all diseased conditions in the breathing organs. It can't fail to help, because it goes where the trouble really exists, and doesn't attempt to cure an illness in the head or throat by means of medicine taken into the stomach. There is no suffering from a gripe cold or any other ailment that won't find relief in Catarrh. It is used by thousands of physicians, ministers, lawyers and public men throughout many foreign lands. Large size lasts two months and costs \$1.00. Small size 50c, sample size 25c, all stockholders of the Catarrh Co., Montreal.

Canadian Teachers' Tour

Two Hundred and Eighty Teachers Will Comprise the Party

The teachers' tour to Great Britain and the battlefields of France and Flanders is to be a memorable event for some two hundred and eighty teachers throughout Canada, and the plans which are nearing completion promise a "pilgrimage" unequalled in interest by any of the previous six annual tours under the Overseas Education League. Teachers from Australia, New Zealand and Newfoundland will join with those from this Dominion in the arrangements for the summer. A special feature of this year's plans is the chartering of practically the whole accommodation of the Canadian Pacific SS. "Scotian" which carries with it all those privileges which guarantee the social and vacation pleasures of the seven day Atlantic voyage. Another attractive item on this year's itinerary is the visit to Oxford, Stratford-on-Avon and Warwick, for during that period the teachers have the unique privilege of hospitality in the Oxford colleges by generous permission of the college authorities, through Sir Herbert Warren, President of Magdalen College, Mrs. Haldane and other Oxford friends of the league. Arrangements have been made to accommodate the gentlemen of the party in Balliol College, and the ladies in Lady Margaret Hall and St. Hugh's College where, as temporary resident students, they will dine in the College Halls and be given the freedom of undergraduates. It is not easy for the stranger to Oxford college life to appreciate the significance of this courtesy on the part of the college authorities, which is probably without a precedent. In addition, while at Oxford, specially arranged visits will be made to Blenheim Palace by invitation of the Duke of Marlborough, and to tea at Headington by invitation of Mrs. Morrell.

It is also confidently expected that a civic reception will be accorded to the visitors this year by the Lord Mayor of London in the Guildhall, with luncheon and address by the Lord Chancellor of England, Lord Birkenhead, who stands as one of the foremost and one of the youngest

Strength

Strength of muscle does not indicate strength of nerves. On this account many people who look healthy enough suffer from nervous troubles and cannot understand what is ailing them. Sleeplessness and irritability are among the early symptoms. Indigestion and tired feelings soon follow.

Read this letter from an Ontario man:

Mr. W. L. Gregory, Charles St. E., Ingersoll, Ont., writes: "I had been troubled for quite a while with indigestion. At times there would be a twitching of the nerves of my stomach; and I also found it difficult to get a good night sleep. I am now, however, and owing to the nature of my work my system became run-down. I took a treatment of Dr. Chase's Nerve Food, and found great benefit from this medicine. They did me a great deal of good. I have not been bothered at all with indigestion since, and can sleep much better. I have recommended Dr. Chase's Nerve Food to many of my friends, as I think it splendid for any one run-down and needing a tonic."

Dr. Chase's Nerve Food, 50c a box, all dealers, or Edmondson, Bates & Co., Limited, Toronto.

W. N. U. 1417

Leaders in the public life of Britain today:

The programme for France will include a stay in Paris which promises the utmost interest, for the arrangements are being directed by La Bienvenue Française of which Marshal Foch is President, and Prince Roland Bonaparte the Vice-President. It is through their interest and influence and by the good offices of Madame Boule de Jouvencel, the Secretary-General, that the University of Paris will extend the hospitality of the colleges during the stay in Paris.

Fur Farming

Dr. Church Explains Why Fox Farming in the West Should be Profitable

Last week I told you what had been done by fox farmers on Prince Edward Island. This week I will give a few reasons why the west should be a better place to ranch foxes than the east.

The spring weather of the west is more favorable to the fox puppy. During the months of February, March and sometimes April, fox puppies are born. In the east during these months there is a considerable amount of rain and damp snow fall. The mother fox goes out and gets more or less wet and when she returns to the den to her young they are subject to more or less contact with this moisture and are often chilled and develop pneumonia, sometimes they die from this.

Now in the west you have clear dry sunshine during this period, which is certainly favorable to the fox pup. The number of fox pups raised should be from one-half to one and one-half per cent. higher in the west than in the east, from exactly the same stock, other conditions being equal.

The average on P.E. Island is between two and three pups to the litter, depending on weather conditions chiefly. It should be between three and four pups to the litter in the west. Another condition favorable to the west is the available amount of cheap food. The east has to pay two, three and sometimes four times as much for most things that the fox eats.

Next week I will give other reasons why fur farming can be successfully carried on in the western provinces. By Dr. W. G. Church, Inspector of Foxes for the Dominion Livestock Branch, Department of Agriculture, Headquarters, Summerside, P.E.I.

Killed by Blood Poison

Used an old razor for paring his corns. Football, because 25c buys a bottle of Football's Painless Corn Extractor which costs nothing more than removing corns and warts without pain. No failure if you use "Putnam's." Refuse a substitute. 25c everywhere.

World's Climate Changeless

Has Been Maintained Ever Since Earth Was Formed

The first striking fact in the geological history of climate is that the present climate of the world has been maintained since the date of the earliest, unaltered sedimentary deposits. The oldest sandstones of the Scotch Highlands and the English Longmyndins show that in pre-Cambrian times the winds had the same strength, the raindrops were of the same size, and they fell with the same force as at the present day. The mean climate of the world has been fairly constant, though there have been local variations which have led to the development of glaciers in regions now free ice, at various points in the geological scale. That there has been no progressive chilling of the earth since the date of the oldest known sedimentary rocks is shown by their lithological characters, and by the recurrence of glacial deposits, some of which were laid down at low levels at intervals throughout geological time, according to the United States Geological Survey.

May Appoint Ram Grader

Alberta sheep breeders fed in line with those of Saskatchewan and the Eastern Provinces at their annual meeting in Edmonton, recently, when they decided to ask the Federal Government to appoint a ram grader to grade the pure-bred rams brought in to the annual fair sale. Although this will not mean that all the pure-bred rams offered for sale in the province will be graded, as is now being done in the Maritime it is a step forward in that direction.

Trees About Prairie Schools

A short time ago very few school districts in the prairie provinces planted trees about the schoolhouse, but in the last three years the number has been steadily increasing. This year in Saskatchewan alone 150 school districts will plant trees. The seedling trees are obtained from the Dominion Forest Nursery Station at Indian Head, Sask.

Baku's Oil King

Rebuilding Fortune Ruined by Soviet Nationalization is Optimist Though Over 100

At the age of 101 years, Hadji Tagiev, Baku's former oil king, who was ruined by Soviet nationalization of his property, has started to rebuild his fortunes where he began—as a stone mason.

Hadji Tagiev is an optimist. "A man isn't old so long as he can work," he declared, and like a true Muslim man he continues to dye his white beard brown.

He is using his spare moments in learning to write. For more than 20 years he had signed his name to business papers by making his mark with a blunt stick dipped in ink.

One must keep up with the times," he explained to curious friends when the centenarian began to take lessons.

Tagiev is known to Americans through his reception in his Baku palace two and a half years ago of the General James H. Harbord mission. He is known throughout Russia and the Middle East as an example of a poor man who became immensely wealthy, first as a house builder, and then, 60 years ago, through the purchase of a piece of oil land that yielded abundantly. This was in the days when oil was gathered close to the surface and taken from wells in barrels.

When the Azerbaijan republic was Sovietized by Moscow, his palace was converted into a children's orphanage and his treasures of art and tapestry scattered. While trying to take some of his silver plate and paintings to the country in oil carts apparently laden with straw, a red sentinel at the outskirts of the city discovered and seized the escaping king.

Tagiev was beloved by the workmen of Baku and was not harmed in person.

He is now living in the village of Marda Khanli, near Baku.

Food for the Motor

Substitute for Gasoline Can Be Made From Waste Products of Paper Mills

There were sixty-nine thousand motor vehicles in Canada in 1914. That figure had been increased to over four hundred thousand last year. These vehicles, if placed upon a highway, would form a procession 1,760 miles long. In other words, the first car would be entering Winnipeg when the last one was just leaving Halifax.

It will be realized that these cars consume an enormous amount of gasoline. A conservative estimate places the quantity of "gas" consumed in Canada last year at nine million gallons, which would cost something like two and a half million dollars. The Council for Scientific Research at Ottawa has found that a suitable alcohol substitute for gasoline can be made from the waste product of Canada's paper mills. As a result of further experiments, it is believed that there will be an extensive movement to have cheap industrial alcohol take the place of the more expensive gasoline.

Prepared for Worst

An Irishman who was signing articles on board a ship began to write his name with his right hand, then, changing the pen to his left hand, finished it.

"So you can write with either hand, Pat," asked the officer. "Yis, sor," replied Pat. "Whin I was a boy me father (rist his soul) always said to me: 'Pat, learn to cut yer finger nails with your left hand, for some day ye might lose your right.'"

HEART WOULD BEAT LIKE A TRIP HAMMER

Heart trouble has of late years become very prevalent. Sometimes a pain catches you in the region of the heart, now and then your heart skips beats, palpitates, throbs, or beats with such rapidity and violence you think it is going to burst.

You have weak and dizzy spells, sinking sensations, are nervous, irritable and depressed, and if you attempt to walk upstairs or any distance you get all out of breath.

We know of no remedy that will do so much to make the heart regain strength and vigor, regulate its beat and restore it to a healthy normal condition as will

MILBURN'S HEART AND NERVE PILLS. Mr. Chadwick, Delhi, Ont., writes: "I had palpitation of the heart, and the least exercise, such as going upstairs or a hill, my heart would beat like a trip hammer and at times I was dizzy-headed and had a sinking sensation as if my time were running out."

A friend suggested I try Milburn's Heart and Nerve Pills, so I procured three boxes, and by the time the first one was used I began to improve. In all I took six boxes, and now although in my 64th year I feel like a young man, no dizziness or heart-thumping, and can walk miles without fatigue. At time of sickness I weighed 120 lbs. now 160 lbs.

Price 50c a box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Albanian Women Will Wear Dresses

Transfers as the national costume Albanian women are to disappear with the next generation. The Mohammedan mothers have decreed this after seeing the smart, comfortable and sensible dresses worn by women members of the American Red Cross mission there, and observing the results of their work among the girls.

GAS IN THE STOMACH IS DANGEROUS

Recommends Daily Use of Magnesia To Overcome Trouble Caused by Fermenting Food and Acid Indigestion

Gas and wind in the stomach accompanied by that full, bloated feeling after eating are signs of certain evidence of the presence of excessive hydrochloric acid in the stomach, creating so-called "acid indigestion."

Acid stomachs are dangerous because too much acid irritate the delicate lining of the stomach, often leading to gastritis accompanied by serious stomach ulcers. Food ferments and sours, creating the disagreeable gas which distends the stomach and hampers the normal functions of the vital internal organs, often affecting the heart.

It is the worst of folly to neglect such a serious condition or to treat with ordinary digestive aids which have no neutralizing effect on the stomach acids. Instead get relief from a few drops of Epsom's Magnesia and take a teaspoonful in a quarter glass of water right after eating. This will drive the gas, wind and bloated right out of the body, sweeten the stomach neutralize the excess acid and prevent its formation and there is no neutralizing effect on the stomach acids. Instead get relief from a few drops of Epsom's Magnesia and take a teaspoonful in a quarter glass of water right after eating. This will drive the gas, wind and bloated right out of the body, sweeten the stomach neutralize the excess acid and prevent its formation and there is no neutralizing effect on the stomach acids.

Band Instruments Wanted

Salvation Army at Regina to Organize a Boys' Band

The Salvation Army is forming a Junior Boys' Band at Regina, and are sending out a call for brass instruments. The purpose is to form a band of boys, thirty strong, who will eventually be promoted to the senior organization as they grow older and gain more experience.

It is believed that in numerous towns and villages and farm homes there must be many brass instruments that are not being used. The Salvation Army requests that these be sent along, no matter what condition they may be in, and good use will be made of same. Any persons who may not be willing to donate instruments might write the Salvation Army, quoting the lowest figure they would be willing to accept. Any town council or municipality having instruments could not do better than put them to this use. Instruments can be sent by express to Adjutant C. H. Tuttle, Salvation Army, 204 St. John St., Regina, Sask., or to Wm. F. Gascoigne, Bandsman, 1865 Victoria Ave., Regina.

Animal Freak Is Found

Zoologists are trying to classify a peculiar form of animal life found in Upper Niagara River. The freak is twelve inches long. The fore part of the body resembles a lizard, while the hind part looks like a fish. The mouth is like that of a catfish. The animal is of a spotted brown color and has a smooth skin. It has four legs, the feet being formed like human hands, but with only four fingers. The ears have four lobes, with a tuft on each lobe.

Three of a Kind

Premier Dunning, of Saskatchewan, was born in Leicestershire, England; Premier Oliver, of British Columbia, was born in Derbyshire, England; Premier Greenfield, of Alberta, was born in Lincolnshire, England. If this does not encourage immigration from England to the Canadian west, what will?

The WISHING FAIRY
Corinne

Concerning Skunks and Other Things.

"STELLA, dear," cried a Brownie, breathlessly running to her from the direction of the Get Little Pool, "a rather large bird has just reached the end of the Earth and wants to see you. We asked him his name, but he was so exhausted when he got here that he could hardly speak, and so we couldn't understand."

"Very well," Stella smiled, "I'll go and see him. I suppose I had better bring my wand with me, for I am sure to be asked to make some wish come true."

When they arrived there, however, their tired, thirsty visitor had drunk so deeply of the Get Little Pool and had consequently become so little that they couldn't even find him until a faint call from him showed them where he was crouching in the lower branches of a tree near the pool.

"Hello!" laughed the Fairy. "Who are you?"

"I am a Hoatzin," was the answer that drifted down from the tree, "and I'm so tired that I don't know how to get up. I just couldn't move. You see," he added, "I have flown all the way from South America and I'm not used to flying. We Hoatzins never fly if we can possibly help it."

"A bird that doesn't fly?" exclaimed Pinzie. "Why, that's almost as unlikely as a fish that doesn't swim. Just what do you do? Stand on your head?" And Pinzie grinned and giggled, which so annoyed the Hoatzin that he immediately forgot how tired he was and flew down to their midst.

"No, snarly, I don't," he angrily said to Pinzie, "but I have sharp claws, and you'll feel them unless you are more polite."

Pinzie was just about to throw off his funny little Brownie shirt and engage in battle when Stella stepped between them.

"Here, here!" she cried. "Let's all be friends. Tell me, Hoatzin, have you a wish? Is that why you made such a tremendous effort to come here?"

"The Bird nodded. 'I wish for some means of protecting myself.'"

"How about those wonderful, sharp claws of yours?" teased Pinzie from behind Stella's skirts, but the Hoatzin paid no attention.

"Suppose you know about a very pretty little black and white animal called a Skunk," Stella said. "It had the same wish as yours, which I granted by giving it a disagreeable strong odor, that other animals and even humans will go out of their way to avoid it. I shall do the same for you, though in your case it won't be necessary to give you quite so strong a means of protection."

The Hoatzin looked a little anxious. "But," he exclaimed at length, after having thought things over, "as I soon will grow used to my new disagreeable gift and as my enemies never will, why should I care? It's a wonderful idea, and thanks ever so much, Stella."

The Fairy waved her magic wand over his head and immediately the Hoatzin had such a disagreeable scent that the Brownies ran away. He gave a harsh grating hiss as they left him, which is what all Hoatzins do when they are annoyed, and then he flew to the Get Big Pool for he wanted to drink from it so as to once more be his usual size before flying back to South America.

Then Stella saw that he was about as large as a Phoenix, with olive and white upper feathers and dull brown stomach ones. The tip of his tail was brilliant yellow—the same shade as his very beautifully curved crest. He was really an exceedingly lovely Bird.

Hoatzins live in groups near rivers, swamps or lakes. Their nests are built of loose sticks coated by the water, and Mrs. Hoatzin lays four yellowish eggs that are flecked with red. The babies when hatched have no feathers, but they have long, strong claws which they use for climbing among the branches aided by the weak as well.

Hoatzin's or "Stink Birds" (as they are often called) dislike flying, and they rarely use their wings except to go from tree to tree.

Genuine Aspirin
Bayer

WARNING! Say "Bayer" when you buy Aspirin. Unless you see the name "Bayer" on tablets, you are not getting Aspirin at all. Why take chances?

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions for

Colds Headache Rheumatism
Toothache Neuralgia Neuritis
Earache Lumbago Pain, Pain

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists. Aspirin is the trade mark (registered) of Bayer, Manufacturer of Monoacetic acid of Salicylic acid. While it is well known that Aspirin means Bayer manufacture, to make the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Quickly Relieves Constipation

Don't let constipation poison your blood and curtail your energy. If your liver and bowels don't work properly, take **CARTER'S LITTLE LIVER PILLS** today and your trouble will be relieved. For dizziness, lack of appetite, headache and bloated skin try them. Purely vegetable. Small Pill—Small Dose—Small Price.

WORLD HAPPENINGS BRIEFLY TOLD

Judge Boinin, 43, who was the investigating magistrate in the famous Landru case, dropped dead of heart failure in Paris.

The cost of living in Great Britain fell a further four points in March. On April 1 it was still 82 per cent. above the pre-war level.

A new judicial district, which will be known as the judicial district of Assiniboia, has been created by an order-in-council.

Charles Tuth, of Boston, who expects to swim the English Channel in August, has engaged passage on the Winifredian, sailing for Liverpool on July 6.

Preparations are being made by the University of Saskatchewan to resume this summer its field work on the soil survey of the province which was commenced a year ago.

The Canadian Government steamers *Stadacona* and *Armenides*, tied up in silence at Esquimaux for many months past, are offered for sale by the Dominion Government.

Two marine officers and a marine private were instantly killed at Quantic, Va., when two airplanes in battle practice locked wings in the air and plunged to the ground.

The Alberta Teachers' Alliance opposed the practice of school boards receiving applications for teachers and holding position open for the lowest bidder, in a resolution passed at the conference held at Calgary.

The shipping crisis in Italy has resulted in the tying up of 152 vessels of a total tonnage of 730,755. There are 50 vessels at Genoa, 27 at Naples, 18 at Venice, 16 at Trieste and 10 at Toulon.

Captain G. S. Little and Sergeant James L. Johnson, army fliers from Kelly Field, San Antonio, were killed when the airplane in which they were flying went into a nose dive at a height of about 100 feet.

Hazrat Mohani, president of the all-India Moslem League, and who headed the separatist movement in the last Moslem Congress, has been arrested at Calcutta on a charge of sedition.

A conspiracy among Russian monarchists in Central and Eastern Europe to kill Nikolai Lenin if he dares to step outside Russia, is said by secret service men at Riga to have had more or less of a bearing on the fact that Lenin did not go to Genoa for the investigation is now under way and it is hoped shortly to present for consideration a complete position scheme for the Canadian National Railways.

This information was given to C. A. Cavres, Liberal, Tunicu, by the Minister of Railways in the House of Commons.

A call to Canadians living in New England to return home and help in the building up of their own country in the period of after-war reconstruction, was made by Lance J. Logan, member of the Canadian Parliament for Cumberland County, Nova Scotia, addressing a Canadian night meeting in Symphony Hall, Boston, under the auspices of the local organizations.

The First Watch Spring

In Early Days Watchmakers Used Pig's Bristle. In the early days of watch-making, science had not yet developed itself sufficiently to be made a part of the timepiece's delicate mechanism. It was therefore given to one of the commonest of barnyard animals—the pig—to make an important contribution to the science of horology. The first hair spring was actually made from a hog's bristle, and it worked very well indeed, and also served to demonstrate the correctness of the principle involved. The next step was the substitution of a steel spring, and this led to the development of the coiled hair spring which is in use in the modern watch.

POSSIBLY YOUR OWN WIFE

She may not look so young and pretty as she used to be. If her cheeks are hollow and pale, if she is tired and nervous, her system needs a good regularizing with Hamilton's Pills, a real medicine that is noted for restoring the bloom of health to sickly girls and women. Dr. Hamilton's Pills tone up the entire system. Complexion quickly becomes rosy, spirits rise, strength increases daily. Health, vigor and good looks will soon return to a faded woman, if she uses Dr. Hamilton's Pills. Sold everywhere, 25c per box, or from the Cathartine Co., Montreal.

Another British Trade Ship

Some time ago arrangements were completed for the building of a special vessel to act as a floating exhibition of British manufactures. For various reasons the voyage of this has been postponed for a year or two. Meanwhile a large British liner has been acquired for the purpose of being converted into a trade ship. The cabins will be used for the accommodation of the representatives, and the holds and other portions of the vessel will be adapted for exhibition purposes.

NOTHING TO EQUAL BABY'S OWN TABLETS

Mrs. Georges Lefebvre, St. Zenon, Que., writes: "I do not think there is any other medicine to equal Baby's Own Tablets for little ones. I have used them for my baby and would use nothing else. Mrs. Lefebvre says thousands of other mothers say. They have found by trial that the Tablets always do just what is claimed for them. The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach and thus banish indigestion, constipation, colic, etc. They are sold by medicine dealers or by mail at 25c, a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Thomas, the cartoonist, suggests a new speedometer for speedsters. On the dial, plainly indicated, the arrow advances in the following order: Fine, jail, hospital and morgue.—From the Ottawa Journal.

For years I have never considered my stock of household necessities as complete until I had a bottle of Minard's Liniment in my medicine cabinet. It cures, and I know of no better remedy for a severe cold in the head, or that will give more immediate relief than to inhale from the bottle through the nasal organ. And as to my supply of veterinary remedies, it is essential, as I have had very many instances to prove its value. A recent exhibition of medicine demonstrated its great worth and prompts me to recommend it to all who have a herd of cows, large or small. I think I can say with confidence that the patient medicines there is none that covers as large a field of usefulness as does Minard's Liniment. A real trustful good man or beast.

CLARA K. ROBINSON, Chebogue Point, N.S.

Same Old Stuff
—She—Am I the only girl you ever loved, Joe?
—He—Oh, I should say not, but my taste has been improving right along.

If the patient has faith in the doctor, should not the doctor trust the patient? That's why some doctors die poor.

One reason why some people never do much good is because they are unwilling to do a little at a time.

Coming from Illinois

Renewed Interest Being Taken in Western Canada by American Farmers. (Special Correspondence by G. C. Porter, of Winnipeg)

Chicago, Ill.—Illinois, the great corn State, has sent many stalwart farmers to the Canadian prairies in other years, and this year the prospects are better than ever. C. J. Broughton, the Dominion Immigration Agent here for twenty-five years, told the writer today that he was most hopeful this spring for a renewal of the interest in the farms of the Canadian North-west.

Conditions are ideal in this State for the movement northward. Tenants here must not only pay one-half of their production as rent, but must in addition pay the taxes and keep all buildings in repair. The burden is driving some of the best farmers in the State to look for new fields.

In discussing the matter Mr. Broughton said, "I would like to see the Government establish agents at important centres like Brandon, Regina, Saskatoon, Calgary, Edmonton and other points to whom we immigration agents down here could give letters of introduction. It would be a big improvement over present plans and organizations. Such an agent would have the time to see and talk to these people on arrival, also the data, maps and information a prospective immigrant must have if he is to intelligently decide the big question of moving into a new farm home.

In nearly every western daily paper here, there are special articles by staff men who have been sent into rural centres for the purpose of ascertaining the feelings of the farmers about sticking to the soil and remaining at home. When one hears of crops lost in some sections of Western Canada by being "blown out," some people imagine that this is an evil not known elsewhere. While in Kansas recently, I saw scores of references to sections that would produce no wheat this year because the grain was blown from the wheat stalk. A miller at Newton, Kansas, told me that the U.S. milling industry is figuring on \$1.75 wheat before the new crop is harvested. Tenant farmers are resentful because the grain they had sold in process of liquidation last fall at from 70 to 80 cents, while now the same grain is quoted at \$1.20, and yet the co-operating grain growers own and control one-half the grain elevators of Kansas. They have not, however, as good a marketing grain act as has Canada, nor are the farmers as a whole nearly as progressive.

An Oil Without Alcohol.—Some oils and many medicines have alcohol as a prominent ingredient. A judicious mixture of six parts of this compound Dr. Thomas' Electric Oil, and there is no alcohol in it, so that its effects are lasting.

High Price for Tea
Less Produced in 1921 and Stocks Are Exhausted

During 1920 so much more tea was produced than was required through out the world that the market dropped considerably below point. So serious was the position of the growers in India, Ceylon and Java that they agreed to produce 29 per cent less tea during 1921. The result was that less tea was produced than was required, and now all surplus stocks have pretty well been exhausted to fill the demand. Prices in the last four months have steadily advanced until the market today is at a level as high as was ever before reached even during war years.

CATARRH
Catarrh is a local disease chiefly influenced by conditions of the system. HALL'S CATARRH MEDICINE is a Tonic, taken internally, and acts through the blood upon the mucous surfaces of the system. HALL'S CATARRH MEDICINE assists Nature in restoring normal conditions.

New Railway Projects
Railway Extension Contemplated in Peace River District

The north country is to have the giant share of railway extension projected for the coming season of construction, according to the Alberta Minister of Railways. A branch line from the westward of Grande Prairie to the Edmonton, Dunvegan and British Columbia Railway, is being contemplated, bringing the steel into the Lake Saskatchewan district.

Another extension will be a new link of 12½ miles on the Canada Central line west of Peace River Crossing, taking the steel into the Waterhole district from the present terminal at Berwyn.

He—"I used to work in a clock factory."
She—"What did you do?"
He—"I made faces."

A little bit of patience makes the sunshine come, and a little bit of love makes a very happy home.

London's House Shortage

Peculiar Stories Told in Court by Homeless People
Remarkable stories concerning the house shortage in London were told in the Bow Street Court during the hearing of a batch of possession summonses. One man said he had packed his family in one room while he slept in a shed in the garden throughout the winter. A woman said it was now customary to read the obituary notices and then enquire at the house whether the death meant accommodation for a lodger.

Another man told the court he had married two wives, but had never lived with his wife because his landlady refused to have her in the house. A new employment for commercial travellers was revealed namely, seeking houses and rooms for clients on commission.

As a verminage an effective preparation is Mother Gray's Worm Expeller, and it can be given to the most delicate child without fear of injury to the constitution.

Unique Wedding Gift
The Slovaks of the Butchka district of Jugo-Slavia, in accordance with tradition, plan to present King Alexander with a shirt woven of pure gold and silver threads on the occasion of his marriage to Princess Marie of Rumania.

Dye Dress, Skirt Or Faded Curtains In Diamond Dyes
Each package of "Diamond Dyes" contains so simple any woman can dye her dress, skirt, stockings, sweaters, shoes, coats, etc., in any color, without any special skill or knowledge. The perfect home dyeing is sure because Diamond Dyes are guaranteed not to fade, stain, streak, or run. Tell your friends whether the material you wish to dye is wool or silk, or whether it is cotton, rayon or mixed goods.

Centennial
A captain of an Atlantic liner was bothered by a woman passenger who was always inquiring about the possibility of seeing a whale. A dozen time a day she besought him to have her called if one was in sight.

"But, madam," the captain asked her, rather impatiently after long suffering in silence, "why are you so eager to see a whale?"

"Captain," she answered, "my desire in life is to see a whale blubber. It must be very impressive to watch such an enormous creature cry."

This Man Could Not Walk a Mile
WILLIAM GRAHAM SHOUTS THE PRAISES OF DODD'S KIDNEY PILLS.

Hurt in 1919 He Searched in Vain for the Remedy He Needed Till He Started to Use Dodd's Kidney Pills.

Lindsay, Ont.—(Special)—Mr. William Graham, who lives at 162 Queen St. here, is shouting the praises of Dodd's Kidney Pills. And when he tells the reason why the story is truly wonderful.

"I was hurt in 1919, Mr. Graham states, 'the nerves in my left leg and arm were paralyzed. I was in such shape I could not walk a mile. Now I can walk fifteen miles. I recommend Dodd's Kidney Pills to all sufferers.'

Dodd's Kidney Pills put the kidneys to work to strain all the impurities out of the blood. That means pure blood. Pure blood means good circulation and that means new strength carried to all parts of the body.

Ask your neighbors if Dodd's Kidney Pills do not make strong, healthy kidneys.

Air Line Between New York and Chicago
Plan Provides for Two Planes to Carry 200 Persons

Daily flights between New York and Chicago by aeroplanes carrying hundreds of persons will be inaugurated soon, according to announcement by Mrs. Edith Rockefeller McCormick.

Mrs. McCormick said that she became interested in the plans for the air line two years ago. They provide for two passenger planes costing \$2,000,000 each with a capacity of 200 persons and 25,000 pounds of extra freight. The New York-Chicago trip is expected to take ten hours.

A Record Casting

The largest from casting ever made in Great Britain and one of the largest ever produced in any country, was recently turned out in a British factory. It weighed about 110 tons and the mould was built in a 16 foot pit. Seven hours were occupied in melting the metal, and the casting was poured in just under five minutes. Three weeks were occupied in cooling the casting. Owing to its enormous size and weight the casting had to be delivered by road, six traction engines being used for hauling it.

Hoarseness Rubbed Away Quickly by Nerville

Changeable weather causes congestion and sore throat. The blood must be drawn from the inflamed part, and this is speedily done by applying Nerville. The beauty of Nerville is that it penetrates quickly. It is not only and every drop sinks right in. It draws out the inflammation, eases the pain, makes the chest and throat wet quickly. For relieving coughs, colds, hoarseness, Nerville is the proper remedy. Thousands say so. Large 35c bottles sold everywhere.

Fine Instinct
"It seems to me," remarked the customer, as she watched the assistant trim the hair of a man she had bought, "you are wasting a good deal of that meat."

"Not at all, madam," he said gently, "I weighed it first."

Miller's Worm Powders destroy worms without any inconvenience to the child, and so effectively that they pass from the body unperceived. They thoroughly cleanse the stomach and bowels and leave them in a condition not favorable to worms, and there will be no revival of the pests.

Examining Fabrics by X-Rays
Can Test Fibre in Automobile Tires by this Process

X-rays have been employed in recent years for many other purposes than that of examining the tissues of the body. They have been employed in the examination of metals and of manufactured articles such as aeroplane parts. One of the latest and most interesting applications is in the testing of the fibres of the canvas used in the manufacture of pneumatic motor tires. In order to give a distinct X-ray photograph the yarn or canvas must be soaked in very dense materials which absorb the X-rays. This treatment is apt to damage the fibre, but a British company has managed, after many experiments, to produce a solution with which the material can be impregnated without any deterioration. The X-ray examination shows the extent to which the warp and the wool stretch, and it also reveals the changes in structure and in strength which canvas undergoes when soaked in rubber solution. By means of this highly scientific treatment it is possible to determine how the canvas should be woven to remain square and strong.

The Mysterious "They"
Person Who is Mostly Responsible for All Gossip

Arthur H. Folwell is responsible for the following in Leslie's Weekly: Who is it that says that So-and-So is sure to go on the road to woe? That drink and cards will lay him low? "They." Who is it that says without remorse that Some One contemplates divorce? Whispers, scandal, too, of course? "They." Who says that Mr.—never mind—the other, went out and dined with several—well, you know the kind? "They." Who says that old man White's his-name, is friendly with a certain dame? Who says it is a perfect shame? "They." Who is it that says the Browns and Greens are living far beyond their means? That soon there'll be some dreadful scene? "They." Who is it that always says that Jones cannot afford the car he owns? Who says his income's mostly loans? "They." Who says that Grumpy beats his wife and leads her such an awful life? Who reveals in domestic strife? "They." To cut it short, who knows it all? And tells it when we come to call? And who, in brief, should hire a hall? "They."

A Remote Iron Foundry
The island of South Georgia, where Sir Ernest Shackleton has been buried, is 2,000 miles from civilization, but it is shortly to possess a complete, though small, iron foundry. A British firm has despatched to this distant island one of its special comprehensive plants for making castings required in repairing the machinery of whaling vessels. Any necessary repairs to the ships can also be carried out by this equipment.

Arrogance dims the lustre of the most brilliant intellect and dulls the edge of the sharpest wit.

Men are saved from many a little-ness and traditional slavery by looking away from themselves.

NATURE'S SKIN HEALER

M. Poincare's Favorite Game

When the cares of his office weigh heavily upon him, M. Poincare, the prime minister of France, finds greatest consolation in his favorite game—dominoes!

The premier takes the keenest delight in opposing M. Millerand, the president, or Marshal Foch, and the three great men have spent hours on end fighting mighty battles at the game. M. Poincare's skill seems little less than magical, and even Marshal Foch's knowledge of strategy does not save him from defeat.

The Oil of Power.—It is not claimed for Dr. Thomas' Electric Oil that it will remedy every ill, but its uses are so various that it may be looked upon as a general pain killer. It has achieved that greatness for itself and its excellence is known to all who have tested its virtues and learned by experience.

Floral Highway

To Plant Poppies on Road from Calgary to Banff

To provide a floral highway from Calgary to Banff, in the heart of the Rockies, is a movement that has been initiated, and if plans formulated are consummated Iceland poppies will line the scenic highway to the mountains in countless thousands. Many clubs are co-operating in the movement, and it is proposed to utilize 60 cars each containing four men, to prepare the soil and do the planting, one car being allocated to each mile of road.

According to suicide statistics in the United States, the day on which most acts of self-destruction are committed is Monday.

BEAUTY OF THE SKIN
It is the desire of every woman, to obtain the use of Dr. Chase's Ointment. Pimples, blackheads, roughness, a redness of the skin, irritation and sebum disappear, and the skin is left soft, smooth and velvety. All dealers, or Edmondson, Bates & Co., Limited, Toronto. Sample free if you mention this paper.

Dr. Chase's Ointment
"The Only Remedy Says This Doctor"

"The treatment of skin diseases (eczema) and diseases of the scalp is known to be difficult," writes Dr. W. L. Randall, "however, there is one remedy that is known to be entirely dependable in the treatment of all such diseases, and that is Dr. Chase's Ointment. If you have never tried Dr. D. D. for skin diseases, you are missing a great opportunity. The ointment is sold in the form of a small jar, and is guaranteed that if it doesn't relieve you, your money will be refunded. \$1.00 a bottle. Try Dr. D. D. Soap, too."

D.D.D. THE Lotion for Skin Disease
If you cannot call at a local dealer's write to the D.D.D. Laboratories, Dept. W-116, 27 Loyal, Toronto, and they will send you free trial bottle if you enclose 10c which merely pays for postage and packing.

MONEY ORDERS
